

MKE 자동제어 실험실용 소형 사출 성형시스템 (MKE Mini-Ject Pro)

MKE

i-RheoComp®

자동제어/DAS 장착 소형 사출 성형기

- Shot volume: 3.5 to 20 ml
- Two ways melt accommodation
 - Conduction melting
 - Transfer from micro compounder
- High injection pressure (1,500~2,100 bar)
- Max temp. : 400 °C
- Dual transfer unit
- Easy cleaning
- Low noise: < 50 db
- Versatile mold selection
 - ASTM, ISO complies
 - Rheometer specimen
 - DMA sample
- Suitable for SuperEP research
- High speed injection option available
- Compatible with Xplore and Haake system
- Injection Control Device (optional)
(incl. Digital air pressure regulator)

- Computer control and DAS system in the same machine
- Precise injection pressure control via advanced computer
- Process monitoring for [injection stroke, injection pressure, mold temperature and etc.](#)
